

Neighbourhood Management

This course is intended for residents and community groups who are interested in developing some form of neighbourhood management in their areas. **Its aims** are to give participants an overview of neighbourhood management, help them understand and explore the options for developing it, and decide on a way forward in their areas.

Outline programme

- Session 1 What is neighbourhood management?
- The key conditions for successful neighbourhood management
- How should local people and communities be involved?
- Session 2 Experiences of neighbourhood management
- Case studies from the government's pathfinder programme and elsewhere
 - Lessons from experience
- Session 3 The process of developing neighbourhood management
- Which service-providers should be involved – and how?
- Governance – neighbourhood partnership boards
- Session 4 Barriers – and how they might be overcome
- Action planning
